Skills

C# & .NET

Java

Python

Web Dev (HTML/CSS/JS)

SQL & Databases

OOP & DSA

Profile

Software Engineering undergraduate (2028) with a strong foundation in desktop application development using C# (.NET Framework), Java, and Python. Passionate about Object-Oriented Programming (OOP), Data Structures, and Algorithm Analysis. Experienced in building intuitive user interfaces with Windows Forms and Java Swing. Eager to contribute to professional software teams, leverage analytical skills for complex problem solving, and continuously adopt modern development practices.

Projects

HR Management System — 2025

C# .NET Desktop Application

- Developed a desktop application using C# and .NET to streamline HR processes.
- Implemented a job ranking algorithm to filter and sort candidates based on weighted criteria (Experience, Skills).
- Designed candidate data management, automated scoring, and reporting interfaces.

Restaurant Management System — 2024

Java Swing Application

- Built a comprehensive management solution for restaurants using Java Swing.
- Key modules included table reservation, order processing, inventory tracking, and billing.
- Utilized OOP principles to ensure code modularity and maintainability.

AlgoPuzzleBoard — 2024

Educational Visualization Tool

- Interactive platform visualizing complex algorithms like N-Queens and Knight's Tour.
- Implemented dynamic UI updates using C# to demonstrate backtracking strategies step-by-step.

Education

Bachelor of Software Engineering SEPT 2024 - PRESENT

Bahria University, Karachi

Focus Coursework: OOP, Data Structures, Algorithms, Calculus, Linear Algebra.

Intermediate (Pre-Engineering) COMPLETED 2024

Karachi Public School

Certifications

- **Certified Software Engineering Student** - Bahria University
- Participant in internal coding hackathons and logic building competitions.
